Systems

Top Reasons to Choose NetApp for a Fibre Channel SAN Solution

MAXIMIZE STORAGE RESOURCES

Improve efficiency

You can perform dynamic reconfigurations, instant provisioning, and easy data restores with zero downtime when you automate with our FlexVol® technology.

Maximize storage utilization

You can get the most out of your disk space when you use our FlexVol technology to nondisruptively grow or shrink volumes and share disk spindles for increased I/O performance.

INCREASE AVAILABILITY AND PRODUCTIVITY

Boost productivity

You can automate and simplify backup, restore, and failover with NetApp SnapManager® and SnapDrive® thanks to integrated management with Oracle®, SAP®, Microsoft® SQL Server™, Microsoft SharePoint® Server, and Microsoft Exchange integrated management.

Speed recovery

You can quickly and accurately retrieve individual mailboxes and e-mail messages—saving you time and administrative resources—with NetApp's Single Mailbox Recovery (SMBR) for Microsoft Exchange.

Reduce downtime

With our fully redundant systems for enterprise-class storage, you can leverage host-based multipathing and clustering services to help increase your uptime.

Protect more data

You can extend data protection to your entire enterprise application portfolio and secure all your data types with our Fibre Channel solutions.

MAXIMIZE BUSINESS CONTINUITY

Simplify backup and restore

You can reduce your backup administration time by up to 75% when you use NetApp SnapVault®. With SnapRestore®, you can restore data in seconds, saving you both time and money.

Increase availability and protect against disaster

You get global data availability and disaster recovery in a single solution. Our SnapMirror® technology delivers easy setup, synchronous and asynchronous mirroring, and mirroring to and from any NetApp system. With Metro-Cluster, you get integrated high availability (HA) and disaster recovery to further protect against site disasters for the price of HA.

REDUCE COSTS

Reduce total cost of ownership (TCO)

You can lower your administrative overhead by taking advantage of our simplified processes for backup, recovery, and provisioning. And you can increase your capacity utilization with our advanced virtualization capabilities.

Get the solution that's right for you

When it comes to NetApp Fibre Channel SAN solutions, you have a wide range of options to choose from. From entry level to high end, primary to secondary systems, we offer you a variety of sophisticated software solutions for data and SAN management.
